

Curriculum Vitae

Peter Fausbøll

Nationality: Danish

Year of birth: 1972

Languages: Danish (First language), English (Fluent)

Roles: Energy and data specialist.

Senior specialist with 25 years of experience from the energy sector. The consultant helps energy and utility organisations turn complex market, tariff, and risk data into reliable decision support using SQL, Power BI, Python, and quantitative modelling.

The consultant is specialised in getting models, numbers and calculations from database systems right.

Work experience

2026 -

INDEPENDENT ENERGY SECTOR CONSULTANT, REGENDA

Own consultancy within:

- Regulatory implementation
- Compliance documentation
- Contact with authorities
- Offshore wind tenders
- Tariff calculations
- CfDs, PPAs, hedging
- Risk calculations
- Market analyses
- Project management
- ETRM systems
- Billing systems
- Power BI / SQL setup
- Dataflow mapping

2025-2025

SENIOR RISK ANALYST, MOMENTUM GRUPPEN

- Managed delivery of a full rebuild of the company's ETRM risk management system, improving performance, reliability, and transparency across business-critical processes.
- Led stakeholder alignment between risk, trading, and IT teams to ensure consistent understanding of hedging models and risk exposures.
- Produced a 100-page governance-ready documentation package, enabling continuity, auditability, and smooth handover.
- Ensured data quality, model validation, and operational stability, supporting risk committees and senior management decision-making.
- Maintained and documented the NordPool API interface, ensuring reliable data flows for risk reporting.

Power BI
SQL Server
Python
MIP
Optimization
REST-API

2023-2024

CONSULTANT, CONFEDERATION OF DANISH INDUSTRY

The consultant set up a data platform architecture for a system of electricity market statistics.

- Designed and delivered a data platform for electricity market statistics, coordinating requirements across business users, analysts, and IT.
- Implemented structured governance through Azure DevOps, version control, and automated testing, ensuring predictable delivery and transparent progress tracking.

Azure, git
Python
SQL Server
SQLAlchemy
REST-API
Pulp, Pytest

- Managed API integrations with Energinet and DMI, ensuring stable, validated data pipelines for market insights.

Azure Dev-
Ops
VS Code

2021-2023

SPECIAL CONSULTANT, DANISH ENERGY AGENCY

Right at the center of Danish renewable energy policy. Planning of 9 GW auctions for offshore wind. The consultant created algorithms for selecting winners in complex scenarios and created tools for calculating energy tariffs in the Danish energy system.

GAMS
Python

2016-2021

SPECIAL CONSULTANT, THE DANISH UTILITY REGULATOR

- The Consultant assessed and approved rules for the electricity market in Denmark. Especially day-ahead and forward markets.
- The consultant conducted 2 analyses of the forward market in Denmark for Power and analyzed 2 GB of trading DB.
- The consultant guided Nordic workgroups on electricity trading rule coordination with participation of Nordic TSOs and energy regulators. This laid the ground for the first agreement on flow-based capacity calculation in the Nordics.

Python

2009-2016

SENIOR COMMERCIAL ADVISOR, DONG ENERGY E&P

- The consultant led a complex, multi-stakeholder project involving engineers, lawyers, and external consultants to resolve a major technical insurance case, securing a favourable outcome.
- Negotiated a €100M abandonment security agreement between joint venture partners, ensuring alignment across commercial, legal, and technical interests.
- The consultant contributed to the development of DONG Energy's project manual, strengthening governance and delivery standards.
- Wrote specifications and performed testing for an oil logistics system, ensuring operational readiness and compliance.

2002-2009

COMMERCIAL ADVISOR, DONG ENERGY TRADING

- The consultant specified a nomination system for gas logistics. The supplier was the company Logica, and the consultant performed factory approval and site acceptance tests of the system.
- The consultant was part of a group that wrote specifications for an ETRM/CTRM (Allegro) system together with external consultants.

SAS
Excel
Visual Basic

1998-2002

DEVELOPER AND CONSULTANT, COWI

The consultant made several mathematical models of transport systems and advised on optimal freight management for a courier company. The consultant specified and developed the "TEMA2000" for the Danish Ministry of Transport. This Windows tool could calculate emissions from transportation.

GAMS
Turbo Pascal

Education

2019-2021	WIND ENERGY MASTER, DTU The consultant took a master's degree of 60 ECTS at the Technical University of Denmark. The content of the course was wind resources, materials, measurement techniques, offshore wind, numerical tools, grid connection and integration of wind power, aerodynamics and components.	SQL Server Python
1992-1997	M. SC. BUSINESS ADMINISTRATION AND MATHEMATICS, CBS The consultant specialized in the optimization of large mathematical systems at DTU. This included LP, MILP, NLP, and the use of the GAM programming system. The optimization methods are used today in gradient descent algorithms in AI/machine learning and flow-based methods for capacity calculations.	GAMS

Stack and Certifications

LAST USED / YEAR OF CERT.		
2026	PYTHON, C#, .NET, VS CODE, VISUAL STUDIO, GIT, PYTORCH, MLOPS	
2025	SQL SERVER (ON/OFF AZURE)	
2025	POWER BI PL-300 Microsoft certification in the use of Power BI, including DAX, m-code. Data preparation, modelling, visualization, and security in Power BI.	
2025	AZURE AZ-900 Microsoft certification in Azure fundamentals, including apps, functions, vaults, metrics, identity management, and SQL database.	
2025	DEVOPS AZ-400 Microsoft exam in Azure-based DevOps. Design and implementation processes and communication, design and implementation of source control strategy, design and implementation of build and release pipelines, development of a security and compliance plan, implementation of an instrumentation strategy.	
2021	PRINCE2-FOUNDATION Certification in project management.	

Courses and further education

2026

LINUX FOUNDATION ENERGY SUMMIT 2026 CONFERENCE

2026 - SPRING

ENTERPRISE ARCHITECTURE, ITU

The Consultant took a 7.5 ECTS ITU course in Enterprise Architecture. This included: EA's role in digital transformation, business and application perspectives for EA, EA's role in strategic alignment of business and IT, design and modelling techniques in baseline and target architecture, and governance structures within architecture.

2026 – SPRING

PROJECT MANAGEMENT, DTU

A 10 ECTS DTU course in classical project management. Assessment of project scope, analysis of stakeholders, analysis of risks, structuring of the project, planning of deliverables, follow-up on progress and outcomes, management of the project team, systemic management.

MS Project

2026 – SPRING

AGILE PROJECTS, DTU

5 ECTS DTU course in agile projects. The course covered: Scrum methodologies, agile planning, agile philosophy and use-cases.

2026 – SPRING

OBJECT-ORIENTED PROGRAMMING, DTU

10 ECTS DTU course in C#. Class libraries, file I/O, control structures, inheritance, polymorphism, interfaces, collections, serializations, class diagrams, basic UML, window programming, object-oriented constructs and generic classes.

Visual Studio
.NET, C#

2026 – JAN.

MACHINE LEARNING OPERATIONS, DTU

5 ECTS course (02476) in ML-OPS. The course lasted 15 days and focused on developing, testing, and deploying machine learning models using a DevOps scheme in the cloud. Proper coding environments, code organization code and data version control, reproducible and containerized environments, unit testing, continuous integration, continuous machine learning, cloud-based machine learning.

PyTorch, Git,
Docker, Pytest,
CI/CD, G Cloud.

2026 – FEB

AGENT IN A DAY, MS

Agents in Copilot Chat, Agents in Copilot Studio & Demo, Tools in Copilot Studio. Columbus / Microsoft

CoPilot

Languages

ENGLISH

The consultant has worked at DONG with several English and/or German managers. The consultant has negotiated contracts in English and is fully fluent in this language.

SWEDISH

The consultant has spent a lot of time negotiating and discussing business with Swedish natural gas grid companies. The consultant has also worked as a project manager for the Nordic co-operation with the Danish energy regulator. The consultant is therefore well versed in reading, listening and speaking Swedish.

GERMAN

The consultant can fully read German text and listen to spoken German. The consultant is currently taking courses in German speaking and aims for fluency in 2027.
